

Flight Training Solutions

B737NG Course

The Type Rating Course aims to provide a qualified pilot with the required license and ratings needed to operate a specific aircraft platform. By working closely with partner airlines, Flight Training Solutions ensures that trainees receive tailored training based on the airlines operating procedures, helping to create a smooth transition to flight operations and minimize the need for additional training.

Simulator Type

B737 NG Level D FFS

Prerequisites

Oral and written English skills according to ICAO Level 4
Valid CPL with ATPL theory credit
Valid multi-engine IFR rating
Valid class 1 medical certificate
MCC course (The type rating can be combined with the MCC)

Training documents

Every student pilot will receive the following documents and data during the welcome session:
Course syllabus
Training record
Aircraft manuals, QRH (digital form)
Access to our LMS/e-learning platform so you can start familiarising yourself before beginning the course

Theoretical training

The ground training is delivered during classroom lessons in 13 days (7 Hours per day):

- Although media tools are used, it is always under the supervision and guidance of the instructor, that is, we will not let you clicking a CBT on your own all day long.
- Use of Cockpit Procedures Trailer and standalone FMC trainer.

Practical training

- 32 Hours on a Full Flight Simulator (10 as PF & 10 as PM) in 8 sessions
- 4 hours on a Full Flight Simulator for the License Skill Test

Course Duration

Typically 29 days
